

Guddi Silai — Complete Website Requirement

1. Website ka main objective

Website ka primary purpose:

1. **Ready-to-Buy Blouses**
 - Already stitched/ready products
 - Size + color selection
 - Add to Cart
 - Buy Now
 2. **Customize Blouse with Custom Measurement**
 - Customer design/fabric/fiber select kare
 - Apna measurement provide kare
 - Stitching ke liye order place kare
 - Measurement instructions + GIF/video guidance
 3. **Blouse Design Showcase / Upcoming Designs**
 - Sirf designs showcase honge
 - Future/upcoming designs
 - Buy/Cart nahi
 - WhatsApp enquiry/share/like jaise options ho sakte hain
-

2. Homepage

Website open karte hi directly blouse designs dikhne chahiye.

About, Contact, etc. homepage ke top par unnecessarily space nahi lenge.

Header

Simple Indian-user-friendly header:

- Guddi Silai logo
- Home
- Ready to Buy
- Customize
- New Designs
- Search 
- Wishlist 

- Cart 
- Menu 

Mobile par:

- Logo
- Search
- Wishlist
- Cart
- Hamburger menu

Important

Login compulsory nahi hoga.

User bina login ke:

- Products dekh sakta hai
- Categories browse kar sakta hai
- Search kar sakta hai
- Product details dekh sakta hai
- Images zoom kar sakta hai
- WhatsApp enquiry kar sakta hai
- Wishlist/cart use kar sakta hai

Login sirf un features ke liye useful hoga jahan user information save karni ho.

3. Main Super Categories

Top-level categories:

Ready to Buy

Already stitched blouses.

Customize with Measurement

Customer apna measurement dekar blouse banwa sakta hai.

Showcase / Upcoming

New/future designs jo abhi sale ke liye available nahi hain.

4. Product Super Categories

Har section ke andar common categories:

- Designer
- Simple
- Silk
- Bridal
- Party Wear
- Wedding
- Traditional
- Embroidery
- Sleeveless
- Full Sleeve
- New Designs
- Trending
- Upcoming

Admin ko **custom categories create/edit/delete** karne ka option bhi hona chahiye.

Isliye categories hard-coded nahi honi chahiye.

5. Homepage Product Display

Homepage par infinite scrolling hona chahiye.

Example:

Designer Blouses

Product 1 | Product 2 | Product 3

Product 4 | Product 5 | Product 6

↓

User scroll kare

↓

Automatically more products load

↓

No "See More" button.

Infinite Scroll

Backend pagination/cursor pagination use karega, jisse 500–1000 products hone par bhi website slow na ho.

6. Product Card

Har product card extremely simple hona chahiye.

Example:

Designer Blouse Design 006

₹899

₹1,199

25% OFF

★ 4.8 (23)

Available Colors: ● ● ●

Available Sizes: S M L XL

Buttons:

❤️ **Wishlist**

🛒 **Add to Cart**

Buy Now

Customize products ke liye:

Choose Fabric & Customize

Showcase product ke liye:

View Design

7. Product Detail Page

Product image par click karne ke baad detailed product page.

Product Gallery

Multiple images:

- Front
- Back
- Side
- Sleeve close-up

- Fabric close-up
- Embroidery close-up
- Model image

Thumbnail gallery bhi honi chahiye.

8. Mobile-style Image Zoom

Aapne jo feature bola hai woh important hai.

User image ko:

- Pinch to zoom
- Double tap zoom
- Drag/move
- Zoom in
- Zoom out

kar sake.

Desktop par:

- Mouse wheel zoom
- Click + drag
- Zoom buttons

Simple controls

+ Zoom In

– Zoom Out

↺ Reset

User ko kisi technical knowledge ki zarurat nahi honi chahiye.

9. Product Details

Product page par:

Basic Information

- Product Name
- Design ID

- Category
- Sub-category
- Price
- Discount
- Final Price
- Availability
- Fabric/Fiber
- Embroidery type
- Color
- Size
- Stitching information
- Care instructions

Buttons

 Like

 Add to Cart

 Buy Now

 WhatsApp Enquiry

 Share

10. Share Feature

Share button click karne par mobile par native share:

Share this blouse design

Options:

- WhatsApp
- Instagram
- Facebook
- Copy Link
- Other Apps

Desktop par:

Copy Link

11. Ready-to-Buy Section

Ready-to-buy products ke liye customer ko:

Step 1 — Color

Example:

- Red
- Maroon
- Pink
- Black
- Green

Step 2 — Size

- XS
- S
- M
- L
- XL
- XXL
- XXXL

Unavailable combination clearly:

M — Red

Out of Stock

12. Ready-to-Buy Buy Now

Customer:

Buy Now

↓

Color select

↓

Size select

↓

Quantity

↓

Address

↓
Order Summary
↓
Payment
↓
Order Confirmed

13. Customize Blouse Section

Yeh website ka important feature hoga.

Product card approximately same rahega:

Image

Name

Price

Discount

Rating

Customize / Buy

14. Customize → Fiber Selection Popup

Buy Now / Add to Cart click karne par directly cart nahi jayega.

Pehle:

Select Your Fabric / Fiber

Popup open hoga.

Example:

- Silk
- Raw Silk
- Cotton Silk
- Satin
- Velvet
- Brocade
- Net
- Organza

- Designer Fabric
-

15. Fiber Filter

Fiber popup ke andar filters:

Filter by Color

- Red
- Pink
- Green
- Blue
- Black
- Golden
- etc.

Filter by Fiber

- Silk
- Cotton
- Satin
- Velvet
- etc.

Filter by Embroidery

- Zari
- Thread
- Mirror
- Sequin
- Stone
- Pearl
- Aari
- Embroidery

Customer ko visual swatches ke through select karna chahiye.

16. Fiber Selection UI

Example:

Choose Fabric

[Image] Silk
₹299

[Image] Raw Silk
₹349

[Image] Velvet
₹399

Select karne ke baad:

✓ **Selected**

Phir:

Continue

17. Customize Measurement Flow

Fiber select karne ke baad:

Step 1

Design confirm

Step 2

Fabric/Fiber select

Step 3

Measurement

Step 4

Order Summary

Step 5

Payment

Step 6

Order Confirmed

18. Measurement Page

Measurement page ko **extremely simple** banana hai.

Indian ladies ko dhyan mein rakhkar.

Har measurement ke saamne:

- Measurement name
 - Kahan se measurement lena hai
 - Example image
 - GIF/video
 - Input field
 - Unit
-

19. Measurements

Admin configurable measurement fields hone chahiye.

Possible fields:

- Bust
- Under Bust
- Waist
- Shoulder
- Blouse Length
- Sleeve Length
- Armhole
- Upper Arm
- Sleeve Opening
- Front Neck Depth
- Back Neck Depth

Extra custom measurement fields bhi admin create kar sake.

20. Measurement Instructions

Example:

Bust

Kaise measure karein?

Measuring tape ko bust ke fullest part ke around comfortably rakhein.

[Measurement GIF]

Bust: ____ inch

Sleeve Length

Shoulder se sleeve ke end tak measure karein.

[GIF]

Sleeve Length: ____ inch

Blouse Length

Shoulder ke highest point se neeche desired length tak measure karein.

[GIF]

Blouse Length: ____ inch

21. Measurement Unit

User choose kar sake:

Inches

ya

Centimeter

Agar possible ho to automatic conversion bhi ho.

22. Measurement Validation

Website invalid measurements accept na kare.

Example:

Bust:

32 inch

Valid.

Bust:

500 inch

Invalid.

System warning:

Please enter a valid measurement.

23. Save Measurement

Logged-in user ke liye:

Save My Measurements

Future order mein automatically available.

Example:

My Saved Measurement

Default Profile

Bust: 34

Waist: 30

Shoulder: 14

Sleeve: 10

User edit bhi kar sake.

Guest user ke liye measurements current cart/order mein temporarily save honge.

24. WhatsApp Enquiry

Har applicable design par:

WhatsApp Enquiry

click karne par WhatsApp open hoga.

Message automatically generate hoga.

Example:

Hello Guddi Silai 

Mujhe ye blouse design pasand hai.

Design: Designer Blouse Design 006

Design ID: GS-206

Category: New Designs

Link: [Design Link]

Please price, stitching details aur availability bataiye.

Thank you.

Important

Design link automatically current product URL se generate hona chahiye.

Admin ko WhatsApp number change karne ka option hona chahiye.

25. Showcase / Upcoming Designs

Third category:

Upcoming Designs

Yahan sirf design showcase hoga.

Product page par:

- Large images
- Design name
- Design ID
- Category

- Fabric information
- Embroidery information
- Color
- Design description
- Expected availability
- Like
- Share
- WhatsApp Enquiry

Add to Cart / Buy Now nahi hoga.

Agar admin chahe to:

Coming Soon

badge dikhega.

26. Wishlist

Heart button se product wishlist mein add hoga.

Guest user ke liye local browser mein wishlist store ho sakti hai.

Logged-in user ke liye database mein save hogi.

Wishlist page:

- Product image
 - Name
 - Price
 - Availability
 - Move to Cart
 - Remove
-

27. Cart Page

Cart mein **2 clearly separated sections** honge.

Section 1 — Ready-to-Buy

Example:

Ready-to-Buy (2)

Product
Color
Size
Quantity
Price

Section 2 — Customize with Measurement

Customize Blouse (2)

Product
Selected Fiber
Measurement Status
Quantity
Price

Example:

Measurement: ✓ Completed

ya

Measurement: △ Pending

Agar measurement pending hai to:

Complete Measurement

button.

28. Mixed Cart

Customer ek hi cart mein:

- 2 Ready-made blouses
- 1 Customized blouse

rakh sakta hai.

Order summary clearly split hogi.

29. Checkout

Checkout simple hona chahiye.

Customer Details

- Name
- Mobile Number
- Email optional
- Address
- City
- State
- Pincode

Google login optional.

Guest checkout allowed.

30. Login System

Login compulsory nahi.

Options:

Continue as Guest

Continue with Google

Login

Google login available ho sakta hai.

Lekin website ka main content login ke peeche nahi hona chahiye.

31. Search

Powerful search hona chahiye.

User search kare:

red blouse

bridal blouse

silk blouse

designer blouse

GS-206

To relevant products aa jayein.

Search product:

- Name
- Design ID
- Category
- Color
- Fiber
- Embroidery

sab par work kare.

32. Filters

Main product listing mein:

Category

Designer

Simple

Bridal

Silk

Price

₹0–₹500

₹500–₹1000

₹1000–₹2000

Color

Red

Pink

Green

Blue

Black etc.

Fabric

Silk
Cotton
Satin etc.

Embroidery

Zari
Stone
Pearl
Mirror etc.

Availability

In Stock
Out of Stock
Upcoming

33. Sort

User sort kar sake:

- Newest
 - Most Popular
 - Price Low → High
 - Price High → Low
 - Most Liked
 - Most Viewed
 - Best Rated
-

34. Product Reviews

Ready-to-buy products ke liye:

★ Rating

Customer review

Photo review

Example:

"Blouse quality bahut achhi hai."

Admin review approve/delete kar sake.

35. Order Tracking

Customer ko:

My Orders

mein:

- Order ID
- Date
- Products
- Amount
- Payment Status
- Order Status

dikhna chahiye.

Order status:

Order Placed

→ Confirmed

→ Processing

→ Stitching

→ Quality Check

→ Packed

→ Shipped

→ Delivered

36. Admin Panel

Admin panel ko normal e-commerce admin se bhi powerful rakhna chahiye.

Dashboard:

Today's Overview

- Visitors
 - New Visitors
 - Returning Visitors
 - Product Views
 - Product Clicks
 - Add to Cart
 - Wishlist
 - Orders
 - Revenue
 - WhatsApp Enquiries
-

37. Visitor Analytics

Admin ko dekhna hai:

User kaha se aaya?

- Country
- State
- City
- Approx location
- Device
- Browser
- Operating System
- Screen size

Traffic Source

- Google
 - Instagram
 - Facebook
 - WhatsApp
 - Direct
 - Referral website
-

38. User Activity Tracking

Admin ko important events dekhne chahiye.

Example:

User:

India → Maharashtra → Pune

Website par aaya.

Then:

Homepage → Bridal Category → GS-206

Product view: 42 seconds

Image zoom: 3 times

Wishlist: Yes

Add Cart: Yes

Checkout: No

Isse aapko pata chalega ki **customers actually kya dekh rahe hain**.

39. Product Analytics

Har product ke liye:

- Total Views
- Unique Views
- Clicks
- Average View Time
- Image Zoom Count
- Wishlist Count
- Add-to-Cart Count
- Buy Now Count
- Orders
- WhatsApp Enquiries
- Shares

Example:

GS-206

Views: 12,450

Wishlist: 832

Cart: 421

Orders: 86

WhatsApp: 194

Isse best-performing designs easily identify honge.

40. Customer Analytics

Admin:

- Total Customers
 - Guest Users
 - Registered Users
 - Returning Customers
 - New Customers
 - Most Active Customers
 - Most Purchased Categories
 - Customer Lifetime Value
-

41. Cart Analytics

Admin ko pata chale:

- Kis product ko kitni baar cart mein add kiya
- Cart mein kitne products currently hain
- Abandoned carts
- Cart abandonment rate
- Kis step par customer checkout chhod raha hai

Example:

GS-206

Added to cart: 400

Checkout started: 220

Purchased: 90

Yeh extremely useful analytics hoga.

42. Order Management

Admin:

Orders

- All Orders
 - New
 - Confirmed
 - Processing
 - Stitching
 - Packed
 - Shipped
 - Delivered
 - Cancelled
 - Returned
 - Failed
-

43. Order Detail

Admin order open kare to:

Customer:

- Name
- Mobile
- Email
- Address
- State
- City

Order:

- Product
- Design ID
- Color
- Size
- Fiber
- Measurements
- Quantity
- Price

- Discount
- Shipping
- Total

Payment:

- Payment method
 - Payment status
 - Transaction ID
-

44. Customized Order ke liye Special Detail

Admin ko clearly dikhna chahiye:

CUSTOM ORDER

Design:

GS-206

Fiber:

Raw Silk — Red

Measurements:

Bust: 34

Waist: 30

Shoulder: 14

Sleeve: 10

etc.

Measurement Instruction Version: v1

Isse stitching team ko confusion nahi hoga.

45. Product Management

Admin:

Add Product

Fields:

- Product Name
 - Design ID
 - Description
 - Category
 - Sub-category
 - Product Type
 - Price
 - Discount
 - Colors
 - Sizes
 - Fiber
 - Embroidery
 - Images
 - Videos/GIF
 - Stock
 - SKU
 - Tags
 - SEO title
 - SEO description
-

46. Product Type

Admin product create karte waqt:

Product Type

- Ready to Buy
- Customize
- Showcase / Upcoming

Isse website automatically decide karegi ki product par kaunse buttons/features dikhne hain.

47. Inventory

Ready products ke liye:

- Stock quantity
- SKU
- Size-wise stock
- Color-wise stock

Example:

Red:

S → 2

M → 5

L → 0

XL → 3

48. Fiber Inventory

Customize section ke liye:

Fiber stock bhi maintain karna chahiye.

Example:

Red Raw Silk — Available

Black Velvet — Available

Pink Silk — Out of Stock

49. Coupon System

Admin coupon create kar sake:

WELCOME10

FIRSTORDER

BRIDAL20

Conditions:

- Percentage discount
- Fixed discount
- Minimum order
- Maximum discount
- Specific category
- Specific product
- Expiry date

- Usage limit
-

50. Offers & Discounts

Admin:

- Product discount
- Category discount
- Festival sale
- Limited-time offer
- Coupon

manage kar sake.

51. Notifications

Admin/customer notifications:

Customer

- Order placed
- Order confirmed
- Stitching started
- Shipped
- Delivered

Admin

- New order
 - New customer
 - Payment received
 - Low stock
 - New enquiry
-

52. Contact & About

Homepage par unnecessary large sections nahi.

Separate pages:

About Us

Contact Us

FAQ

Shipping Policy

Return Policy

Privacy Policy

Terms & Conditions

53. FAQ

Common questions:

- How do I order?
 - How do I give measurements?
 - Which fabric is available?
 - How long does stitching take?
 - Can I modify my measurements?
 - Do you accept returns?
 - How do I track my order?
-

54. User-Friendly Design

Sabse important requirement:

Website technically powerful ho, lekin user ko complicated nahi lagni chahiye.

Especially Indian ladies ke liye:

- Large buttons
- Large images
- Hindi/English friendly labels
- Simple language
- Clear icons
- High contrast
- Minimum steps

- No unnecessary popups
- No complicated forms
- Mobile-first design

Example:

✗ Proceed to Configure Product Variant

Instead:

✓ Fabric Choose Karein

55. Mobile First

Major users mobile se aa sakte hain.

Isliye website:

Mobile → Tablet → Desktop

priority ke according design honi chahiye.

Mobile par bottom navigation useful hoga:

Home | Categories | Wishlist | Cart | Menu

56. Performance

Website mein bahut saari high-quality blouse images hongi, isliye:

- WebP/AVIF images
- Lazy loading
- Responsive images
- CDN
- Image compression
- Infinite scroll
- Pagination/cursor pagination
- Browser caching
- Cloud storage

use karna chahiye.

Image gallery ki wajah se website slow nahi honi chahiye.

57. SEO

Har product ka unique URL:

</blouse/designer/gs-206>

SEO fields:

- Meta title
- Meta description
- Keywords
- Open Graph image
- Product structured data

Google search mein product directly appear ho sake.

58. Social Sharing

Product share karne par WhatsApp/Instagram/Facebook par attractive preview:

Designer Blouse Design 006

₹899

Guddi Silai

Image + link

59. Admin Analytics Dashboard

Main dashboard roughly:

Guddi Silai Admin

Today

Visitors 1,248

Product Views 4,821
Add to Cart 384
Orders 76
Revenue ₹84,500

Top Products

GS-206 1,240 Views
GS-189 982 Views
GS-221 875 Views

Visitors By Location

Maharashtra 42%
Karnataka 15%
Gujarat 11%
Delhi 8%

Traffic Sources

Instagram 45%
Google 28%
WhatsApp 17%
Direct 10%

Charts bhi hone chahiye.

60. Analytics Date Filter

Admin choose kar sake:

- Today
- Yesterday
- Last 7 Days
- Last 30 Days
- This Month
- Last Month
- Custom Date Range

61. Analytics Export

Admin data export kar sake:

CSV / Excel

Examples:

- Orders
 - Customers
 - Products
 - Sales
 - Analytics
 - WhatsApp enquiries
-

62. Admin Roles

Future mein multiple staff ho sakte hain.

Isliye:

Super Admin

Everything.

Order Manager

Orders manage.

Product Manager

Products/images/categories.

Stitching Manager

Customized orders + measurements.

Analyst

Analytics only.

63. Security

Important:

- Admin authentication
- Role-based access
- Secure password hashing
- JWT/session security
- Rate limiting
- Input validation
- XSS protection
- CSRF protection where applicable
- Payment webhook verification
- Admin activity logs

Customer analytics mein IP/location data collect karte waqt privacy/legal requirements ko bhi dhyan mein rakhna hoga.

64. Admin Activity Log

Admin ne kya kiya:

Admin Deepak

12:32 PM

Changed price of GS-206

12:41 PM

Added new fiber

12:50 PM

Changed order #GS102 status → Stitching

Isse accidental changes trace karna easy hoga.

65. Recommended Extra Feature — Recently Viewed

User ne jo products dekhe:

Recently Viewed

Example:

You Recently Viewed

GS-206 | GS-201 | GS-189

66. Recommended Extra Feature — Continue Shopping

Cart se:

Continue Shopping

button.

67. Recommended Extra Feature — Low Stock

Ready-made product par:

Only 2 left

jaisa indicator.

Fake urgency nahi honi chahiye; actual inventory se calculate ho.

68. Recommended Extra Feature — Similar Designs

Product detail ke neeche:

You May Also Like

Same:

- Category
- Color
- Fiber
- Style

ke products.

69. Recommended Extra Feature — Recently Popular

Homepage par:

Trending Blouses

Analytics ke basis par automatically generate ho sakta hai.

70. Recommended Extra Feature — WhatsApp Floating Button

Website ke bottom-right:

WhatsApp 

Lekin product page par click karne par **specific product message** generate ho.

71. Recommended Extra Feature — Call Button

Mobile par:

 **Call Us**

Admin-configured number par direct call.

72. Recommended Extra Feature — Pincode Check

Checkout par:

Enter Pincode

Website:

- Delivery available?
- Estimated delivery date
- Shipping charge

show kare.

73. Recommended Extra Feature — Order Notes

Customer:

Special Instructions

mein note de sake.

Example:

Please keep blouse length slightly longer.

74. Recommended Extra Feature — Measurement Recheck

Customized order place karne se pehle:

Please Confirm Your Measurements

Measurement	Value
-------------	-------

Bust	34"
------	-----

Waist	30"
-------	-----

Shoulder	14"
----------	-----

Sleeve	10"
--------	-----

✓ I confirm these measurements

Phir payment.

Isse wrong measurement ki problem kam hogi.

75. Recommended Database Structure

Backend mein roughly entities:

User

Product

Category

SubCategory

ProductVariant

Color

Size

Fiber

Embroidery

Inventory

Cart

CartItem

Wishlist

Order

OrderItem

MeasurementProfile

MeasurementField

Payment

Coupon

Review

Enquiry

AnalyticsEvent

Admin

AdminRole

Notification

76. Analytics Event System

Analytics ke liye har important action event ke form mein store karna better hoga:

PAGE_VIEW
PRODUCT_VIEW
PRODUCT_IMAGE_VIEW
IMAGE_ZOOM
SEARCH
CATEGORY_VIEW
WISHLIST_ADD
CART_ADD
CART_REMOVE
BUY_NOW
CHECKOUT_START
MEASUREMENT_START
MEASUREMENT_COMPLETE
WHATSAPP_CLICK
SHARE
ORDER_PLACED
PAYMENT_SUCCESS
PAYMENT_FAILED

Isse future mein bahut powerful analytics ban sakti hai.

77. Important: "Kitna Time Product Dekha"

Aapne specifically poocha hai.

Iske liye:

Product View Start

aur

Product View End

events track honge.

Example:

GS-206:

Average time: **1m 42s**

Isse pata chalega ki kaunse designs customers ko actually interesting lag rahe hain.

78. Customer Journey

Admin ko funnel bhi dikhana chahiye:

Visitors

Product Views

Product Interested

Wishlist

Add to Cart

Checkout

Payment

Order

Example:

10,000 visitors

5,000 product views

1,000 cart

500 checkout

200 orders

Isse business ka weak point easily identify hoga.

79. Website ka Recommended Navigation

↓
Share / Like / WhatsApp

81. Sabse important UX principle

Main website ko **"E-commerce website jaisi complicated website"** nahi, balki:

Instagram + Meesho + simple tailoring order system

jaisa experience dunga.

User ko har screen par ek obvious next action milna chahiye.

For example:

Choose Design → Choose Fabric → Give Measurement → Order

Bas.

82. Recommended Tech Architecture

Aapke existing stack ko dekhte hue main recommend karunga:

Frontend

- React
- TypeScript
- Vite
- Tailwind CSS
- React Router
- TanStack Query
- Zustand/Redux Toolkit

Backend

- Node.js
- Express.js
- TypeScript

Database

- MongoDB

Images

Cloudinary / equivalent image CDN.

Authentication

Google OAuth + Guest User.

Payments

India-focused payment gateway such as Razorpay/another suitable provider.

WhatsApp

WhatsApp deep-link based enquiry initially; later WhatsApp Business API if automated business messaging is needed.

Analytics

Custom event tracking + GA4/other analytics + your own database analytics.

83. Website ke 3 Product Types ko technically separate rakho

Yeh architecture ka bahut important point hai.

PRODUCT_TYPE

READY_MADE
CUSTOMIZE
SHOWCASE

Isse frontend mein bahut saare `if/else` ka mess nahi banega.

Example:

READY_MADE

- size
- color
- stock
- cart
- buy

CUSTOMIZE

- fiber
- color
- measurement
- cart
- buy

SHOWCASE

- images
 - details
 - share
 - like
 - WhatsApp
-

84. Final Website Structure

Aapki final website basically:

Customer Website

-

Shopping System

-

Customization System

-

Measurement System

-

WhatsApp Enquiry

-

Wishlist

-

Cart

-

Checkout

-

Order Tracking

-

Inventory

-

Customer Management

-

Advanced Analytics

-

Admin Dashboard

-

Product/Categories/Fiber Management

-
